

# The MOOC Dataset

Contact Andreas Paepcke: [paepcke@cs.stanford.edu](mailto:paepcke@cs.stanford.edu)

# Millions of Interactions With MOOC Courses

- Each assignment submission attempt
- Assignment grades
- Learner nationalities
- Forum posts
- All video interactions
- Time stamps for all data

# Example Problem

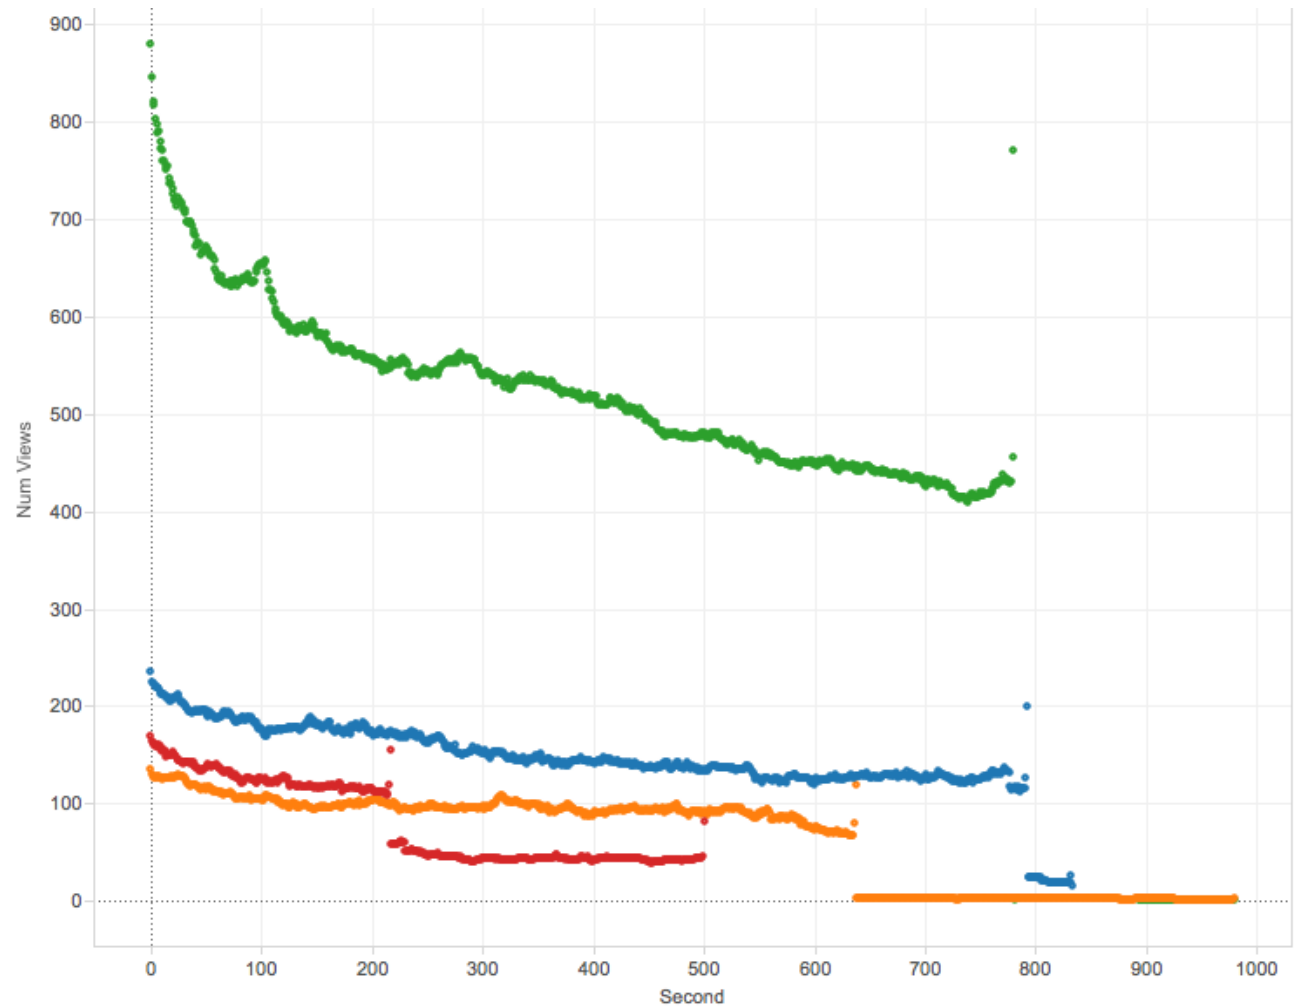

On the right are the 'attention profiles' for three videos of Stanford's compiler class.

X-axis: seconds into the video

Y-axis: number of views (incl. rewinds)

Note how different the profiles look.  
Including only the top 20 learners changes each profile further

Question: Is there an optimal profile for each video that is associated with subsequent assignment success?
