Index

A

Abstract data type 261, 307
See also Dictionary, Priority queue, Queue, Stack
Abstract symbol 593–594
Abstraction 1, 3
Abstraction (of sets) 338–339
Acceptance, of input 533, 539
Accepting state 532, 549
Activation record 313
Acyclic graph 454
Acyclic path 456
Addition 10–12, 716–723
See also One-bit adder, Ripple-carry addition
Adjacency list 459–461, 463
Adjacency matrix 460–462, 515
Adjacent nodes 456
ADT
See Abstract data type
Aho, A. V. 155, 335, 450, 527, 589, 641
Aleph-zero
See Countable set
Algebra 5, 343
See also Algebraic law, Expression, Propositional logic, Regular expression, Relational algebra, Set algebra
Algebraic law
See Associative law, Commutative law, Distributive law, Idempotence, Identity
Algol 641
Algorithm 4–5, 20
Alphabetic order
See Lexicographic order
Ambiguous grammar 610–616
American National Standards Institute 24
Anagram 178
See also Partial anagram
Ancestor 226, 254
See also Lowest common ancestor
`AND` 10, 644, 649, 651–652, 657, 675–679, 688, 700, 740, 756–757
Annihilator 570, 675–676
ANSI
See American National Standards Institute
ANSI C
See C
Anti-implicant 668
Antisymmetry 388–390
Arc 452, 488
Argument size
See Size of arguments
Arithmetic expression 46–50, 62–63, 242–244, 592, 611–615
Arithmetic operator 18–19, 109
Arithmetic series 42
Arity 366
Array 14, 109, 232, 301–306, 308–309, 329–333, 358–360
See also Adjacency matrix, Characteristic vector, Circular array, Heap (data structure)
ASCII 38
Assignment (of values to objects) 157–160
Assignment-statement 19, 109
Associative law 47, 344–345, 441, 570, 652, 675
See also Nonassociative operator
Astrahan, M. M. 450
Atom 338
Atomic formula 735
Attribute 404, 414
Automaton 530–556, 571–590, 637–639, 704
See also Deterministic automaton, ϵ-automaton, Nondeterministic automaton
Average-case running time 93, 215–216, 270–271
See also Running time
Awk 450, 566

B

Backus, J. W. 641
Backus-Naur form
Backward arc 488, 494
Backward induction 72

Bag
See Multiset
Balanced parentheses 64–68, 594–596, 610–611
Bar-Hillel, Y. 641
Basis 28, 35, 44–46, 59, 132
Bayes' rule 202
Bell curve 175–176
Bellman, R. E. 335
Benchmarking 91
Berge, C. 527
Berlekamp, E. R. 88
Big-oh 96–109, 303, 355
Bin 181
Binary operator 50
Binary relation 366, 380–396
Binary search 304–305
Binary search tree 258–271
Binary search tree property 259
Binary tree 253–258
See also Binary search tree, Partially ordered tree
Binomial coefficient 176
Bipartite graph 524
Bit 10, 159
Blackjack 187
Block 110–111, 114–115, 117, 122–123, 597
Block, of a program
BNF
See Backus-Naur form
Body, of a production 593
Body, of a rule 763
See also Hypothesis
Boole, G. 698
`BOOLEAN` 22
Boolean algebra 5, 642
Boolean function 647–648, 655–660
Borodin, A. B. 155
Bounce filter 533–535
Bound variable 741–744
Branching factor 232
Break
See Jump-statement
Bridge 187
Brooks, F. P. 24
BST
See Binary search tree
Bubbledown 276, 508–509
Bubbleup 274–276, 508–509
Bucket 362

C

C 3, 7, 13–20, 22–23, 25, 64, 265, 312, 368, 562, 741–742, 758
Call by reference 265
Calling graph 129–130, 455
Cantor, G. 402
Car 290
Carry 10
Carry-in/out 656
Carry-propagate/generate 717–720
Cartesian product 367–368
Case analysis 683
Cdr 290
Cell 7, 23, 293
Chamberlin, D. D. 450
Character 13
Character class 565
Character string 287, 327–333
Characteristic vector 357–360, 376, 379, 383–384
Child 224, 254
See also Left child, Right child
Chip 523, 711, 731
Chomsky, N. 641
Chromatic number 524
Chuck-a-Luck 182
Circuit 523
See also Logic circuit
Circuit delay 711, 721, 727–728
Circular array 320–321
Clarity 90
Class
See Abstract data type
Clause 692, 738
Clear (operation on stacks, queues) 307–308, 318
Clique 525
Closed expression 755
Closure 393–395, 560–561
See also Connected component, Topological sorting, Transitive closure
Codd, E. F. 450
Coersion 20
Coloring 524–525
Combinational circuit 702
Combinations 171–178, 258
Combinatorics 156–187
Common subsequence 321
See also LCS
Commutative law 47, 344, 441–442, 570, 674–675
Comparable elements 390
Comparison operator 19, 109

Compiler 96
See also Lexical analysis, Parsing
Complement event 192
Complete binary tree
See Full binary tree
Complete graph 522
Complete induction 44–51
Complete proof procedure 695
Complete set of operators 659
Complete tree
See Full tree
Complex number 340
Component, of a tuple 366
Compound event 208–209
Compound statement 114
See also Statement
Concatenation 7, 291, 558–559, 569–570
Conclusion 686
See also Head, of a rule
Concordance 328
Conditional
See If-statement
Conditional probability 193–202
Conjunction 658
Conjunction of events 207–208
See also Compound event
Conjunctive normal form
See Product of sums
Connected component 224, 394–395, 466–478, 499–500
Connected graph 466
Consistent proof system 770
Constant
See Defined constant
Constant factor 98
Constant time 103
Containment
See Subset
Containment, of sets 347–349
Context-free grammar
See Grammar
Continue
See Jump-statement
Contradiction 684–685, 695–696
Contrapositive 683–684
Conway, L. 732
Cook, S. A. 698
Countable set 399
Course-conflict graph
Cover 662
Cross arc 488, 490, 494
Cryptography 219
Current domain/range 369
Cycle 453, 456–458, 495–498
Cyclic graph 454

D

Data model 3–4, 6–20
Data object 6
Data structure 4–5, 8, 20
Database 403, 406
Database scheme 406–407, 410
Dead state 555
Declared domain/range 369
Decrement 19
Deduction 686–692
`DefCell` 23
Defensive programming 71, 117, 246
Defined constant 22
Degree, of a node 252, 462
Degree, of a relation
See Arity
Delete 378, 380, 384, 407, 417–418
Deletemax 271, 276–279
Deletemin 264–266
Deletion 264–266, 291, 295–297
DeMorgan's laws 677–678
Dense graph 461
Depth, of a node 226, 254
Depth-first search 484–501
Depth-first search forest 489–490
Depth-first search tree 486–489
Dequeue 318
Dereferencing 7
Descendant 226, 254
Deterministic algorithm 216
Deterministic automaton 537, 547–556
Dewdeney, A. K. 222
Diagonalization 399–400
Dictionary 259, 274, 293, 351, 363–365, 386
See also Deletion, Insertion, Lookup
Dictionary order
See Lexicographic order
Diff 321
Difference 342, 345, 352, 356, 429–430, 436, 441
See also Symmetric difference
Digital circuit
See Logic circuit
Dijkstra, E. W. 527
Dijkstra's algorithm 502–513
Direct recursion 69, 455
Directed graph 452–456, 702–703
Directory 8
Disjoint sets 539
Disjunction 658
See also Clause

Disjunction of events 205–207
See also Compound event
Disjunctive normal form
See Sum of products
Distance 502
Distribution 181–184
Distributive law 197–200, 344–345, 675–676
Divide and conquer 75, 714, 716–722, 724–730
Domain 368, 414, 745
See also Current domain/range, Declared domain/range
Doubly linked list 299–300
Do-while statement
See While-statement
Duality 678–679
Duplicates, on list 296–298
Dynamic aspects of data model 6
Dynamic programming 323–324

E

Edge 224, 456
Editor
See Text editor
Efficiency 90–91, 95
See also Running time
Egrep 546, 564, 567
Empty list 288, 291
Empty set 338, 345–346, 557, 559, 570
∅-free regular expression 571
Empty stack 307–308
Empty string 29, 557, 559, 570, 594
Empty tree 254–255
Enderton, H. B. 698, 775
Endmarker 331, 618
Enqueue 318
Entailment 769
Enumeration 13
`EOF` 13, 23
ϵ
See Empty string
ϵ-automaton 572–581
Equality, of sets 339
Equipotence 396
Equivalence class 392, 467
Equivalence, of automata 547
Equivalence, of cycles 454, 457
Equivalence, of expressions 344, 346–347, 752
Equivalence, of regular expressions 568–569
Equivalence, of states 555
Equivalence (operator) 651, 674
Equivalence relation 391–393
Error-detecting code 38–40
Euler circuit 484
Even parity
See Parity bit
Event 188
See also Compound event, Conjunction of events, Disjunction of events, Implication of events, Reinforcing events
Exam scheduling 1–2, 524–525
Excluded middle 682–685
Exclusive or 655
Existential quantifier 739, 750, 755–758
Expected value 212–214
Experiment 188
Exponential time 102–103
Expression
See Arithmetic expression, Closed expression, Infix expression, Logical expression, Postfix expression, Prefix expression, Quantifier-free expression, Rectified expression, Regular expression
Expression tree 228–230, 242–244, 434

F

Fact 763
Factor 613
Factorial 57, 60, 170
Fair game 214
`FALSE` 22
Fan-in/out 712–714
Feature size 711
Feigenbaum, E. A. 335
Feller, W. 221–222
Fermat's theorem 219
Fibonacci number 135
Field 14
File 8
Find (component of a node) 470–475
Finite automaton
See Automaton
First 292
First-order logic
See Predicate logic
Fischer, M. J. 335–336
Floating-point number
See Real number
Floyd, R. W. 285, 527
Floyd's algorithm 513–521

For all
See Universal quantifier
For-statement 111–112, 115, 117, 121–122, 129
Fortran 641
Forward arc 488, 494
Fredkin, E. 285
`free` 18
Free variable 741–744
Friedman, A. D. 732

Pattern 529–530, 591
Patterson, D. A. 732
Payoff function 212
Perfect induction
See Complete induction
Perles, M. 641
Permutation 160–167
Peterson, W. W. 402
Pigeonhole principle 638
Pinochle deck 187
Pipe 9
Pivot 514
Planar graph 522–523
Plane presentation, of a graph 522
Plauger, P. J. 24
Pointer 7, 15, 109, 232, 235, 237
Poker 184–186
Polynomial time 102
Pop 306, 308
Postfix expression 243
Postfix operator 64
Postorder 241, 492–494
POT
See Partially ordered tree
POT property
See Partially ordered tree
Power set 349–350
Precedence, of operators 561–562, 567, 646, 652, 740–741
Predecessor 453, 461
Predicate 734–736, 745
Predicate logic 645, 733–775
Prefix 289
Prefix expression 243
Prefix operator 63
Prenex form 757–758
Preorder 239–241
Primality testing 219
Primary index 414–419
Prime implicant 663
Priority queue 271–279, 506
Probability 187–222
Probability space 188
Probe 306
Procedure
See Function
Process 9
Product 26, 657, 688
See also Cartesian product, Term
Product of sums 660, 693, 738
Product rule 200
Production 593
Profile 64–65
Profiling 92
Program correctness proof 26, 52–59, 84–87, 130
Program termination
See Termination
Programming language 6
See also Algol, C, Fortran, IPL-V, Lisp, Pascal, Prolog, SQL
Projection 431–432, 436–437, 444–448
Prolog 5, 733

Proof 682, 759–770
See also Case analysis, Complete proof procedure, Contradiction, Contrapositive, Deduction, Excluded middle, Induction, Program correctness proof, Resolution
Propagation delay 712
Proper subset 347
Propositional logic 9, 642–698
Propositional variable 643, 734
Prototyping 21
Push 306, 308
Pushing projections 444–448
Pushing selections 442

Q

QED 589
Quadratic time 97, 103
Quantifier
See Existential quantifier, Universal quantifier
Quantifier-free expression 757
Query 407
See also Relational algebra
Queue 318–321

R

Rabin, M. O. 221–222, 589–590
Random number generator 191
Range 368, 414
See also Current domain/range, Declared domain/range
Reachable nodes 498–499
See also Warshall's algorithm
Read-statement 110
Real number 13, 340, 399–400
Rear 318
Record
See Structure
Rectified expression
Recurrence relation 132, 144–154
Recursion 6, 25, 69–75, 132–136, 239–247, 256–257
See also Direct recursion, Divide and conquer, Recursive descent parsing
Recursive definition 26–27, 59–69
Recursive descent parsing 617–625
Reduced graph 391
Reflexive-transitive closure 500
Reflexivity 388, 390–391, 674
Regular expression 5, 556–590, 634–639
Reinforcing events 211–212
Reingold, E. M. 402
Rejection, of input 533
Relation 366–369, 380–396, 403–411
See also Binary relation
Relation scheme 405
Relational algebra 428–448
Repeated substitution 134–135, 145–148
Replacement 167, 169, 183
Resolution 692–697
Restructuring, of hash tables 366
Retrieve 292
Return
See Jump-statement
Return-value 17
Reuse
See Software reuse
Right child 253
Right sibling 235–238
Ripple-carry addition 11–12, 716
Ritchie, D. M. 24
Roberts, E. 24, 88
Robinson, J. A. 698
Root 224
Rooted tree
See Unrooted tree
Rosenkrantz, D. J. 641
Rule 763
Running time 27, 89–155, 268–271, 278–279, 283, 354–356, 365–366, 379, 384–385, 476, 482–483, 491, 497, 499, 511–514, 527, 672
Run-time organization 312
Run-time stack 313
Russell's paradox 341

S

Satisfiability problem 673
Scott, D. 589–590
Search
See Binary search, Depth-first search, Linear search, Ternary search
Secondary index 419–423
Selection 167–178, 430–431, 437, 441–443
Selection sort 29–33, 72–73
Selection statement
See If-statement
Sentinel 117, 303
Sequential circuit 702
Sequential execution 699
Sequential search
See Linear search
Set 337–403
See also Infinite set, Probability space

Set former 339
Sethi, R. 24, 335, 589, 641
Settled node 502
Shamir, E. 641
Shannon, C. E. 732
Shortest path
See Dijkstra's algorithm, Floyd's algorithm
Sibling 226, 254
See also Right sibling
Simple cycle 454, 457
Simple statement 109–110, 117, 597
Simplicity 90, 104
Singleton set 350
Size of arguments 71, 85, 127–128, 132
Software development 20–22
Software reuse 21
Sorting 28–33, 163–166, 291, 297
See also Heap sort, Merge sort, Selection sort, Sort-join, Topological sorting
Sort-join 438–439
Source node 502
Spanning tree
See Depth-first search tree, Minimal spanning tree
Sparse graph 461
Special path 502
Splitting lists 79–80, 138–141
Splitting selections 442
SQL 435, 733
Stack 306–318
Start state 533, 548
Start symbol 594
State 530
See also Accepting state, Dead state, Important state, Start state
State machine
See Automaton
Statement
See Assignment-statement, Block, of a program, For-statement, If-statement, Jump-statement, Read-statement, Simple statement, While-statement, Write-statement
Static aspects of data model 6
Static variable 17, 313
See also Global variable
Stearns, R. E. 641
